## PROJECTS

### Project Title:- Digital Marketing Website

- Designed a fully responsive front-end website using HTML, CSS, and JavaScript.
- Included sections for services, testimonials, contact forms, and animated banners.
- Focused on user-friendly layout, SEO basics, and mobile compatibility.
- Gained experience in layout design, UI/UX principles, and front-end logic.

### Project Title: Online Storefront (General E-Commerce Template)

- Built a static e-commerce store template for selling general products.
- Created product cards, category sections, a navigation bar, and a checkout preview page.
- Integrated interactive UI elements using JavaScript.
- Gained skills in product layout, page structuring, and visual hierarchy.

### Project Title: Online Food Ordering Website

- Developed a multi-page food delivery website using HTML, CSS, and JavaScript.
- Implemented menu sections, order forms, pricing lists, and image sliders.
- Emphasized clean layout, responsive design, and intuitive navigation.
- Practiced modular coding and basic client-side scripting for form validation.

## LANGUAGES

---

- English (Fluent)
- Urdu (Fluent)
- Punjabi (Fluent)

- Completed several hands-on projects in C++, including games and logic-based programs using OOP and DSA concepts.
- Built and managed SQL databases for storing and retrieving structured data in academic and personal projects.
- Applied algorithms and data structures to solve real-world coding problems and optimize program performance.
